

### *Your partner since 1990*

APS GmbH offers different testing machines and also extensive expertise and knowledge that comes from more than 25 years of experience in this field to support and manage your testing to the highest standards.

- Soil and rock mechanic research
- Geothermal energy development
- Geotextile/Geosynthetics
- Gas hydrate
- Frozen soil tests
- High temperature tests
- Mining and construction
- Tunneling
- Earthquake mechanics

Dynamic multi-dimensional simple and triaxial shear apparatus

Servo-hydraulic dynamic triaxial testing system

Fully automatic table top consolidation apparatus

Dynamic simple and direct shear apparatus (DSS)

Temperature controlled / true triaxial testing system

Advanced rock polyaxial testing system

Hollow cylinder testing system

Advanced rock triaxial testing system

Resonant column apparatus

Single or combined rock direct shear / triaxial testing system

Large direct shear testing system

High pressure syringe pump
